

Palladio Partners now manages more than EUR 9 billion of assets

German investment boutique has grown continuously since 2012 /
Infrastructure and PE

Frankfurt, 22 November 2023

Palladio Partners has surpassed the EUR 9 billion mark in assets under management¹. For more than a decade, the independent Frankfurt-based investment boutique has been offering German institutional investors global access to investments in real assets, with a focus on infrastructure and private equity. Client-specific solutions are implemented through global access to fund managers as well as direct and co-investments. A focus lies on investments in Germany and especially in important German infrastructure projects.

"We are very pleased that our firm has passed yet another milestone", says Michael Rieder, Managing Partner at Palladio Partners. "When we founded the company in 2012, it was a greenfield project. After just about a decade, we are now one of the largest German investors in infrastructure. This success would not have been possible without our clients, our partners, and our fantastic team. A big thank you to all of them."

Managing partner Bernd Kreuter adds: *"Our investments are contributing to the transformation of the global economy and to a sustainable investment of private German pension assets."*

Most recently, Palladio Partners successfully closed the fourth generation of its infrastructure fund of funds with a volume of EUR 348 million.

About Palladio Partners

Palladio Partners is the specialist for German institutional investors in the field of global investments in real assets, in particular infrastructure investments. The owner-managed investment boutique with offices and subsidiaries in Frankfurt and Luxembourg was founded in 2012. Today with its payroll of over 70 staff members it has assets of approx. € 9 bn under management (incl. advisory mandates). Palladio Partners advises German institutional investors, in particular from the pension sector, on realizing their individual potentially highly complex investment strategies and offers them access to attractive global investment opportunities.
